- Notes:
1. All Values are ppm Total PCBs.
  2. All sample locations are approximate.
  3. A value of 0.0168 ppm is assigned to sample locations where soft sediment samples could not be retrieved after 2 attempts.
  4. All pipeline, underwater structures, archeological features and intake locations provided by J.F. Brennan.
  5. Secondary composite location is shown as the centroid of the secondary sample locations within a RDMU and may fall outside of the RDMU boundary.
  6. PCB values below the limit of detection (LOD) are reported at one-half the LOD.
